Deep-drawing in one step: Streifylit Duo 111P500

The new Streifylit Duo convinces by its unique material combination of plastic and PO-film (foam cover). This material enables to manufacture quickly and efficiently individual, padded night splints in just one deep-drawing process.

Characteristics
• optimal processing temperature at approx. 160°C / 320°F
• for deep-drawing, colourable, light weight, low shrinkage
• break- and scratch resistant, easy to cut, grind and polish
• bio compatible, disinfectable
• PU = 1 sheet (1000 x 1200 x 4,5 mm)
