

## More protection for man and the environment The new silicone cleaner (83E6)

Efficient and gentle cleaning: The new silicone cleaner „soft formula“ is completely not classified according to CLP-regulation and therefore better compatible for man and the environment.

The product dissolves unvulcanised silicone (Episil, MonoSil.HTV) and is perfectly suitable to thoroughly and safely clean silicone rollers, tools or surfaces. It dries quickly and nearly residue-free.

### Eigenschaften

- „soft formula“
- not classified according to CLP-regulation
- suitable for cleaning of silicone rollers, silicone tools and surfaces
- dissolves unvulcanised silicone
- produces smooth silicone surfaces
- contents 500 ml
